

# 9 BENEFITS of EDI

**EDI (Electronic Data Interchange)** transfers information between systems using standardized electronic formats to enable computers to process the information while minimizing or completely eliminating the need for human intervention.

Enterprises Around the World are Realizing the Benefits of EDI

## SPEED

Documents are exchanged in a matter of seconds instead of days or weeks

## STREAMLINED PROCESSES

Processes are streamlined; time-consuming activities such as printing, handling, and filing documents are eliminated

## ACCURACY

Human intervention is reduced leading to fewer human errors such as document mishandling and illegible handwriting

## EXPENSES ELIMINATED

Expenses related to producing and delivering paper documents are eliminated (printing, copying, filing, storage, postage, and even manpower costs)

## COSTS MINIMIZED

Costs due to human error such as filling the wrong order and illegible documents and faxes are minimized

## REAL-TIME TRANSACTIONS

Transactions are done in real-time, enabling faster and better informed decision-making

## ACCESS TO SUPPLIERS & CUSTOMERS

Businesses are given access to suppliers and customers that are already connected via EDI

## UP-TO-DATE INFORMATION

Enterprises are able to respond faster to changing customer needs with up-to-date information

## BETTER BUSINESS RELATIONSHIPS

Better business relationships arise from faster and more efficient transactions

**ABOUT LIAISON** As a leader in cloud-based integration and data management solutions, Liaison helps businesses overcome today's toughest data challenges while building a robust foundation from which to tackle tomorrow's. From complex integration to data management to big data, our secure solutions break down data silos, reduce inefficiencies, and uncover actionable insights.
